

## Swab Station for hollowglass-mouldingmachine

### Advantages compared with customary lubrication containers

- Protection from pollution by implementation as a closed system
- Two variations available: 1700 ml or 2750 ml contents
- light withdrawal, fill and cleaning of the round containers
- sieve application with oil return to the stripping of the lubrication paintbrushes
- lid with magnet fixture for lubrication paintbrush
- an easy cleaning by dismantling of the put on components
- Material: Lid from high-grade steel 1.4301, foundation and sieve application from steel metal
- other implementation and materials possibly
